Popok  
*Non swim diapers*

Bahan katun dan sejenis dapat menampung deterjen, kuman, dan bakteri di dalamnya, yang dapat dilepaskan ke dalam air. Selain itu, akan membuat gerakan perenang menjadi terbatas karena lebih berat.

*Cotton and some other materials can hold detergents, germs, and bacteria in them, which can be released into the water. Additionally, when the cotton absorbs the pool water, it can become pretty heavy, which can weigh down swimmers and make swimming more difficult.*
